Important Dates

July 25-26: Professional Development Day for Teachers

Learning Corner:

- Construction
- Drama/Theater
- Pond Life
- Gardening
- Scavenger Hunt
- Outdoor Observations
- Water Pipes

Songs +Videos on YouTube

- The Planting Song by Mother Goose Club
- Five Little Ducks
- The very Hungry Caterpillar Story

Summary of the learning experience in July:

Fred's fishtank:

Our resident visitor in the month of July is orange and tiny, it breathes underwater, and it'll be our pet of the month.

Water Pipes Construction:

Together we'll be constructing a water pipe model using recyclables such as water bottles, paper rolls, cardboard, and white glue. The finished product will be displayed in the playground all summer.

Planting & Gardening:

The LAU campus shows us lots of trees, flowers, and plants. This time, our little ones will participate in growing this green environment by planting seeds in a pot, or plastic cups and watching it grow every day.

Note:

Professors, student teachers, and scholars come on regular basis to observe, implement, and collect data information for research purposes.

Birthdays

Noha Daoud – July 15

Souheil Daoud – July 20

Home- School Partnership:

-Read a story with your child about the life of the fish under water. What other animals live in the sea? How do they breathe underwater?

- Raise your child's awareness about recycling by encouraging them to work on construction projects using recyclables from home.

- Take your child to a nearby pond so that they can get a first-hand experience on pond life exploration.
